This set includes mandatory utility decals used by the IAF for application on F-16 and F-15 pylons, missile rails, fuel tanks, pods, inert missiles, and more. This set will help you create more authentic and accurate models.

Please note that the markings on the pylons and tanks are inconsistent, with each having different styles of numbers and letters. To determine which specific decals to use, refer to additional sources. For more comprehensive options, consider using Isradecal's decals, which are available on our website.
